The Language of Flowers by The National Gallery

Throughout history, flowers have been widely represented in the arts, with painters, in particular, drawn to their fragile beauty. From Van Gogh's "Sunflowers" to Monet's "Water Lilies," flowers have served both decorative and symbolic purposes in the works of great masters.

Join gallery educator and artist Alex Bowie for a talk exploring floriography, the language of flowers, within the National Gallery's collection.

Refreshments provided with ticket.
